Getting natureheaventreks.com found on Google

What was analysed, fixed and written between 24 and 30 October 2026, what Google Search Console shows so far, and the plan for the next weeks.

PREPARED 30 OCTOBER 2026 · FOR NATURE HEAVEN TREKS & EXPEDITION PVT. LTD.

7×
more Google impressions per day since the domain move (62 → 473 a day)

27 → 13
average Google ranking position (lower is better)

187 / 187
website pages checked: no missing titles, descriptions, headings, links or canonicals

6 + 1
articles made ready to publish (5 improved, 1 restored) and 1 brand-new article written

1. Summary

The website redesign and the move from the old domain were completed earlier in October. This week the focus moved to **search traffic**: understanding what Google already shows, fixing everything that was holding the pages back, and starting the regular content programme (one new article every 2–3 days).

- **Google is showing the site far more often.** Since 14 October, when Google processed the domain move, the site appears in search results about 470 times a day instead of 60–70, and the average position improved from 27 to 13. Clicks are now starting to follow (13 and 26 clicks on the last two days of the data).
- **Every page was audited and fixed** for the basics Google checks: titles, descriptions, headings, links, images, structured data, and the robots file. The site now passes with zero issues on all 187 pages.
- **Broken and lost content was repaired:** 15 broken links inside articles, two articles that had silently gone offline, one missing article redirected, and 26 new links from articles to the treks they describe.
- **Google titles and descriptions can now be edited for every page** from the website's own admin, so the team is never dependent on a developer for SEO text.
- **Content programme started:** a 6-month plan built on 3,346 real Google search phrases; the first new article (Mardi Himal Trek Difficulty) is written and awaiting approval; five half-finished drafts were researched, corrected and completed, ready to publish one at a time.

2. What Google Search Console shows

Data exported from Google Search Console for 15 September – 24 October 2026 and split into three periods.

Period	Days	Times shown in Google	Per day	Avg. position	What was happening
15 Sep – 6 Oct	22	1,367	62	26.6	Old and new site both live; before the domain move
7 – 13 Oct	7	497	71	37.7	Domain move submitted to Google (10 Oct); redirects switched on
14 – 24 Oct	11	**5,204**	**473**	**13.3**	Google transfers the old domain's history to the new site; new titles go live (15 Oct)
23 – 24 Oct only	2	1,147	574	10.6	13 and 26 clicks: the first real clicks from the new titles

Where the site is already visible

- **Trek pages show the price directly in Google** ("product snippets"): 53 clicks from 317 impressions, because of the product data we added to every trek page.
- **Foreign visitors are starting to see the site**: United States 1,274 impressions, United Kingdom 495, India 492, Australia 281 in the period. Very few clicked yet: this is exactly what the new titles and the content programme are for.
- **Articles already on Google's page 1–2 with almost no clicks** (Tilicho Lake 1,341 impressions; Nepal geography 548; How cold is Everest 384; Michael Matthews 375): these seven were given new titles and descriptions on 28 October. Results will be checked around 11 November.

> **Please note:** most clicks recorded before 7 October came from the company's own devices (for example 32 clicks on the privacy policy page from position 87). These were excluded from the analysis. Google can detect and discount this kind of activity, so please do not search for and click the website from the office; it also makes the real results impossible to read.

3. Timeline: day by day

Fri 24 – Sat 25 Oct

Analysis of Google Search Console. Full export reviewed (pages, queries, countries, devices, daily chart). Findings: impressions up 7× since the domain move; most pre-October clicks were internal; eight articles on page 1–2 with near-zero clicks; trek pages mostly at positions 40–80; strong but unclicked demand from the US and UK. All old-site addresses still appearing in Google were checked and confirmed to redirect correctly.

Tue 28 Oct

SEO master plan written (6 months, month-by-month article topics, rules for every article, targets). Keyword research: 3,346 real Google search phrases collected for 38 trek topics and grouped by question type (cost, itinerary, best month, difficulty, permits and guides, comparisons). Inventory of all 61 published articles (length, links, category).
Seven articles re-titled with fact-checked titles and descriptions (Tilicho Lake, Nepal geography, How cold is Everest, Michael Matthews, Rhododendron forests, Traditional clothing, Tibetan culture): all edited in the CMS, live the same day.
Links repaired: 15 broken, redirecting or garbled links inside articles fixed; 26 links added from articles to the trek pages they talk about (articles with no link to any trek: 17 → 7).
Lost articles restored: "Travel insurance for trekking in Nepal" and "Everest without oxygen" had been switched to draft by accident and were showing an error page to Google; both were improved (facts updated, answers added, links fixed) and re-published. The missing "Essential packing list" article now redirects to the packing-list page.
Google titles editable in the CMS: new "Page SEO" settings for every page without its own SEO fields (home, trips, blog, FAQs, galleries, country pages and others) and new fields on region pages; all current titles copied in. During this change the trek pages were unavailable for about one hour in the evening (a database step did not run on the hosting). It was fixed the same evening, all 187 pages were re-checked, and the deployment procedure was changed so it cannot happen again.

Thu 30 Oct

First new article written: "Mardi Himal Trek Difficulty: Day-by-Day Guide". Chosen because Mardi Himal is the largest group of real searches with no article on the site (205 phrases) and the trek page ranks at position 56. 2,400 words, every figure verified, day-by-day grades from our own itinerary, winter conditions, FAQ, four of our own photos, links to the trek page. Saved as a draft for approval.
Five unfinished drafts researched and completed: competitor pages compared, titles rewritten around the phrases people search, facts verified (census figures, pass heights, base-camp altitudes, permit fees, SIM and Wi-Fi costs), broken and empty links fixed, a competitor's watermarked image and an AI-generated image removed, a cover banner carrying the wrong company name replaced, and related-trek cards added. All five are ready to publish one at a time.

4. Fixes made on the website this week

What	Why it matters	Status
Robots file no longer blocks the site's script and style files	Google needs them to render pages properly; this was the most important technical fix	Done

What	Why it matters	Status
Canonical tags added on privacy, terms and legal pages; duplicate contact page redirected	Prevents Google treating pages as duplicates	Done
Missing main heading added on the departures page; region headings no longer read "Region Region"	Clear page structure for Google and readers	Done
Breadcrumb and Article structured data on region, country and travel-info pages	Richer search results and better understanding of the site	Done
Over-long descriptions trimmed on all region pages (were 350–520 characters)	Google cuts descriptions at about 160 characters	Done
Google title and description editable for every page from the admin	The team controls SEO text without a developer	Done
15 broken links fixed and 26 trek links added inside articles	Visitors and Google reach the trek pages from the articles	Done
Two offline articles restored; one missing article redirected	No error pages shown to Google for pages it still lists	Done
Full audit of all 187 pages (titles, descriptions, headings, alt text, links, canonicals, structured data)	Result: 0 issues remaining	Done

5. Content: ready to publish

Each article follows the same rules: the phrase people actually search for in the title, a direct answer in the first lines (this is what Google's AI answers quote), verified facts with figures, a question-and-answer section, our own photos, and links to the trek it sells. Nothing is published without your approval.

Article	Search phrase it targets	What was done	Status
Mardi Himal Trek Difficulty: Day-by-Day Guide (2026/27) — new	mardi himal trek difficulty · for beginners · altitude · in December	Written from scratch, 2,400 words, 4 own photos, 6 FAQs	Awaiting approval
Top 7 Best Base Camp Treks in Nepal — live, improved	best base camp treks in nepal	Comparison table (altitude, days, difficulty, permits), facts per trek, Mardi Himal added, new cover photo	Awaiting approval
Everest Base Camp Trek with Cho La and Renjo La Passes — live, improved	everest base camp cho la renjo la trek	Direct answer, permit fees, 4 links and trek card added (had none), empty headings removed	Awaiting approval
Best Time for the Gokyo Lakes Trek: Month-by-Month Guide — live, improved	best time for gokyo lakes trek	Title sharpened, temperature table by season, links, broken edit discarded	Awaiting approval
Internet & Phone Signal on Nepal Treks: SIM, Wi-Fi & More — new	wifi on everest base camp trek · nepal sim card for trekking	Re-titled around real searches, 2026 cost table added, Starlink status updated	Awaiting approval
Religion in Nepal: Hinduism, Buddhism and Spiritual Culture — live, improved	religion in nepal	Title now contains the search phrase, exact census figures, 2 broken links fixed, 2 unsuitable images removed	Awaiting approval
Travel Insurance for Trekking in Nepal; Everest Without Oxygen — restored	travel insurance nepal trekking; everest without oxygen	Re-published with updated facts, answers and links	Live
7 existing articles re-titled (Tilicho Lake, Nepal geography, How cold is Everest, Michael Matthews, Rhododendron forests, Traditional clothing, Tibetan culture)	phrases from Search Console	New titles and descriptions, fact-checked	Live

Suggested publishing order for the six waiting articles: Base Camp Treks → Cho La & Renjo La → Gokyo best time → Mardi Himal difficulty → Internet & phone signal → Religion in Nepal, one every one or two days.

6. The plan for the next weeks

When	Work
31 Oct – 10 Nov	Publish the six waiting articles one at a time. Write the next articles in the plan: Mardi Himal trek cost; Khopra Danda trek itinerary; Gosaikunda trek from Kathmandu; Poon Hill for beginners; Annapurna Base Camp, Langtang and Everest Base Camp in December (winter planning searches are rising now).

When	Work
Around 11 Nov	Check Search Console: did the seven re-titled articles gain clicks? Adjust titles that did not.
November	Trek pages: add cost breakdown, permit fees, best months and FAQs to each, so they answer the searches people make (e.g. "manaslu circuit trek cost", currently position 46). Merge duplicate "best time to visit Nepal" articles.
November onwards	Authority outside the website (the part only the company can do): ask every past client for a Google and TripAdvisor review, keep the Google Business Profile active weekly, make sure TAAN / Nepal Tourism Board listings link to the site, ask partner agencies for a link.
Monthly	One-page report: visitors from Google, top searches, articles published, enquiries.

Targets

100–300 real Google visitors a month by the end of November 2026; 1,000–2,000 a month by April 2027. These are working targets for a new domain with few backlinks, not guarantees; progress is reported every month against them.

7. Decisions and help needed from Nature Heaven

Item	Why	
Approve the six waiting articles (or send corrections)	Publishing starts the day they are approved	You
Stop searching for and clicking the website from company devices	Google can discount it and it hides the real results	You
Confirm three figures with the office: Khumbu municipality permit fee (NPR 2,000 or 3,000), Everest Link Wi-Fi card prices, typical teahouse Wi-Fi and charging prices	Used in the Cho La and Internet articles, currently written as approximate	You
Set the Mardi Himal trek page difficulty to "Moderate" (it says "Easy")	Every source and both new articles say moderate; Google notices contradictions	You
Is the himalayanguardian.com booking link in the travel insurance article a paid partnership?	If yes, Google requires it to be marked as sponsored	You
Start collecting Google and TripAdvisor reviews from past clients; share the TAAN / NTB listing details	Links and reviews from outside are what lift trek pages onto page 1	You
Still open from the previous report: registration number for the footer; the public email address shown in the footer	Trust signals on every page	You

Appendix A. The seven re-titled articles (28 October)

Article	Old Google title	New Google title
/blogs/tilicho-lake-a-himalayan-paradise-in-the-annapurna-region	Tilicho Lake: A Himalayan Paradise in the Annapurna Region	Tilicho Lake (4,919m): Location, Trek Route & Best Time
/blogs/nepal-s-geographical-location-and-landscape	Nepal's geographical location and landscape	Nepal Geography: 3 Regions, Landforms & Size Explained
/blogs/how-cold-is-it-on-mount-everest	How Cold Is It on Mount Everest	How Cold Is Mount Everest? Summit & Base Camp Temperatures
/blogs/michael-matthews-on-mount-everest-story	Michael Matthews on Everest: What Really Happened?	Michael Matthews on Everest: What Happened and Was He Found?
/blogs/rhododendron-forest-nepal	Rhododendron Forest Nepal	Rhododendron Forests in Nepal: Best Treks & Bloom Time
/blogs/nepal-traditional-clothing	Nepal Traditional Clothing	Nepal Traditional Clothing: Daura Suruwal to Gunyo Cholo
/blogs/tibetan-culture-history-dress-food	Tibetan Culture History Dress Food:	Tibetan Culture: Traditions, Dress, Food & Religion

Appendix B. Links repaired inside articles (28 October)

Problem found	Count	Fix
Links to old-website addresses (/st_tour/…, /destinations/…, /services/, /activities/…)	8	Pointed straight at the matching trek, region or trips page
Garbled links (address repeated inside itself, "https://https://…")	5	Rebuilt as the correct address
Links to pages that no longer exist (an unpublished insurance article; a trek address with a wrong ending)	2	Pointed at the travel-insurance page and the correct trek page
Articles that mentioned a trek by name without linking to it	26 links in 20 articles	The first natural mention of each trek now links to its page

Prepared by Aryan Pariyar (VirtuGrow) for Nature Heaven Treks & Expedition Pvt. Ltd. Data: Google Search Console export 15 Sep – 24 Oct 2026; site audit 28 and 30 Oct 2026.
